

There absolutely should be a national list so people can make one call or send a postcard or e-mail and stop telemarketing calls. I do not purchase anything from phone solicitors and make it a point not to. I find telemarketing calls to be nothing more than a nuisance during the day.

I think the current time of day limits for telemarketing calls should be changed to 10:00 AM until 6:00 PM if they can't be eliminated altogether.

There is absolutely no excuse for sending unsolicited junk faxes. No company or individual should be allowed to send blanket junk faxes for any reason. They should also not be allowed to send faxes that do not identify the sending fax number or caller ID. My company is required to do that, why aren't they? These junk faxers have to stop! The annual cost every year in the United States to print this unwanted, unwarranted junk has to be an enormous expenditure. This is a burden to company resources and costs far too much money annually.
